+ LATEST PROJECTS

- www.jonny.me/tweetmap • Side project
Developed a web application that fetches and pins recent tweets on a map using the Twitter Search API 1.1, Google Maps API v3, HTML5 geo-location, and Bootstrap v3.
- www.thephonelady.com • Halifax, NS
Converted a PSD to a custom responsive WordPress theme using Semantic.gs, SASS, HTML5, CSS3, jQuery, AJAX, PHP, Twitter API 1.1, WP functions/hooks, and Trello to manage project use cases and deadlines.
- www.jonny.me • Portfolio
Designed and developed a minimal, responsive portfolio using HTML5, CSS3, jQuery, PHP, and form validation.
- [www.github.com/jonnymaceachern](https://github.com/jonnymaceachern) • Work samples
Experience with Git using the command line (pushing/pulling, commits, logging, branching, merging) as well as GitHub repositories.

+ GENERAL EXPERIENCE

- Proficient with Chrome Developer Tools and Firebug: DOM manipulation, emulation, and resource optimization. Success fixing iOS/Android quirks in Chrome using remote debugging.
- PHP experience sanitizing user input, account login systems, PDO / prepared-statements, WordPress development, as well as MySQL CRUD functionality.
- Developed a quick and efficient workflow taking advantage of Sublime Text plugins (i.e. Emmet), Grunt tasks, Bower, SASS, and Balsamiq mockups.
- While freelancing, met with various clients to discuss, plan, and train in all matters related to their web presence and content management (Atlantic Ex-Works, Nova Aquaponics, Viva Group, & Herder Holiday Homes).
